

**RAMIRENT****SitePlanner™**

## The site planning tool of the future has arrived!

### Welcome to your virtual workplace

SitePlanner™ is for those who appreciate ease of use and power in one tool. Smart mapping and tools help you quickly build up clear 3D models for both small and large projects. No installation is required. Pricing is simple.

### Solve problems before they occur

Even before you break ground on the site, you can easily place fences, gates, loading areas, sheds, lights, cranes, etc. to check out how everything works on the project site. By navigating the timeline for the entire project or reviewing the site in 3D from different angles, you can detect and eliminate any problems and shortcomings in advance.

An easy way to incorporate safety and efficiency right from the start!

### Full flexibility

- Easy to use, requires no special prior knowledge
- Unlimited editing possibilities
- Option to invite more users to the project
- Web-based solution, requires no installation
- Easy browser access from any PC

### Full control

- Safety and order in the workplace with the latest site plan layout
- Ability to view the workplace from different angles in both 2D and 3D
- True to scale objects in all map views
- Built-in map functionality with the ability to import and upload a municipal map, site layout, etc.

## How much does SitePlanner cost?

SitePlanner costs only **10 euros** per month and user for unlimited projects. Free user support is included. Other trainings will be priced separately.

When your project ends, it's easy to stop using SitePlanner.

*The cost above excluding VAT (ALV).*

## Try SitePlanner for free for 30 days!

Try it yourself – one of the most flexible site planning tools on the market.
